Lot: 0006380519

Catalog Number: 240198
Product Name: pCMV-3Tag-4 Epitope Tagging Mammalian Expression Vector
Expiration Date: 2020-08-30
Quantity: 20 µg (each vector)
Certified By: Tim Sanchez
Quality Controlled By: Matt Huffman
Shipping Conditions: Shipped on dry ice.
Storage Conditions: Store at -20°C upon receipt.

Concentration: 1 µg/µl

Description:
The pCMV-3Tag-4 vector features three copies of the e-myc epitope tag, located downstream of the multiple cloning site, and is used to epitope-tag a protein of interest at the C-terminus. The presence of three copies of the e-myc epitope enhances detection of the fusion protein in downstream applications.

Test Conditions:
Each pCMV-3Tag-4 vector (version A, B, or C) is incubated at 37°C for 60 minutes and run on a 0.8% (w/v) agarose gel to verify the absence of contaminating nucleases. The plasmids are also verified by sequencing.

Notice To Purchaser:
The use of the CMV Promoter is covered under U.S. Patent Nos. 5,168,062 and 5,385,839 owned by the University of Iowa Research Foundation and licensed FOR RESEARCH USE ONLY. For further information, please contact UIRF at 319-335-4546.

Limited Product Warranty:
This warranty limits our liability to replacement of this product. No other warranties of any kind, express or implied, including, without limitation, implied warranties of merchantability or fitness for a particular purpose, are provided by Agilent. Agilent shall have no liability for any direct, indirect, consequential, or incidental damages arising out of the use, the results of use, or the inability to use this product.

For Research Use Only. Not for use in diagnostic procedures. This certificate is a declaration of analysis at the time of manufacture.
