Catalog Number 5190-6411
Product Name SureSelect Strand Specific RNA Library Prep, ILM, Box 2
Expiration Date 2018-11-30
Quantity 96 Samples
Certified By Kelly Flesher
Quality Controlled By Matt Huffman
Shipping Conditions Shipped at room temperature.
Storage Conditions Store at +4°C upon receipt.

Materials Provided
- Oligo (dT) Microparticles, 96 reactions
- RNA Seq Bead Binding Buffer, 96 reactions
- RNA Seq Bead Washing Buffer, 96 reactions
- RNA Seq Bead Elution Buffer, 96 reactions
- Nuclease Free Water, 96 reactions

Description
The SureSelect Strand Specific RNA Library Prep Kit includes the reagents needed to prepare strand-specific RNA sequencing libraries for Illumina sequencers.

Test Conditions
The reagents are used to prepare poly(A) RNA from total RNA. A cDNA sequencing library is then prepared and sequenced on an Illumina sequencer to verify that it meets a series of quality specifications.
